OrangeHealthLabs
A UNIT OF ORCHARD HEALTHCARE PVT LTD

Name	: **Ms. Preeti Rani**	Age / Sex	: 36 Year(s) / Female	Collected On	: 02/05/2024 08:33 AM
Patient ID	: OHPC9MXT785664	Ref. Doctor	:	Received On	: 02/05/2024 10:37 AM
Visit No.	: BL81823601			Reported On	: 02/05/2024 12:20 PM

Test	Results	Units	Biological Reference Interval
IMMUNOLOGY			
Vitamin B12 Serum,CLIA	**<159**	pg/mL	239-931
Vitamin D (25 OH Cholecalciferol) Serum,CLIA	38.4	ng/mL	Deficient: < 20 Insufficient: 20-30 Sufficient: 30-100 Toxicity: > 100

For the diagnosis of vitamin D deficiency it is recommended to have clinical correlation with serum 25 (OH)vitamin D, serum calcium, serum PTH & serum alkaline phosphatase.
During the monitoring of oral vitamin D therapy - suggested testing of serum 25(OH)vitamin D is after 12 weeks or 3 months of treatment. However, the required dosage of vitamin D supplements & time to achieve sufficient vitamin D levels show significant seasonal (especially winter) & individual variability depending on age, body fat, sun exposure, physical activity, genetic factors (especially variable vitamin D receptor responses), associated liver or renal disease, malabsorption syndromes and calcium or magnesium deficiency influencing the vitamin D metabolism.

Prolactin Serum,CLIA	14.4	ng/mL	Non-pregnant: 2.6-31.9

Prolactin is secreted in a pulsatile manner and is also influenced by a variety of physiologic stimuli, therefore it is recommended to test 3 specimens at 20-30 minute intervals after pooling. Macroprolactin assay is recommended if prolactin levels are elevated, but signs and symptoms of hyperprolactinemia are absent or pituitary imaging studies are normal.

Orange Health Labs

NABL & ICMR CERTIFIED | TRUSTED BY 1M+ CUSTOMERS

IN MATTERS RELATED TO HEALTH, FASTER IS BETTER.

We equate showing care to showing urgency.

Blood starts deteriorating the minute it leaves the human vein, unless stored right. We have built our logistics to achieve the **fastest vein-to-machine testing time** in the industry, and in our journey ahead will strive to reduce it further as much as possible.

HOW ARE WE FASTER THAN OTHERS?

We identified two gaps in diagnostics: **sample transportation time** and **processing delays.**

We have solved for these problems by our approach of:

NO COLLECTION CENTRES

Your samples are sent straight to our labs at the right temperature.

NO BATCH TESTING

We don't batch your samples to save costs. They are tested the moment they come in.

NO TIME WASTED

Since we test your blood the fastest, you get the most accurate reports in the industry.
